Established: 1983

A leader in the industry, Toronto Redi-Mix supplies a wide spectrum of clients, ranging from developers and builders to high volume contractors and municipalities across the Greater Toronto Area. Our plants supply various grades of ready-mix concrete for a variety of applications, from high-rise condominiums to basement foundations to structural reinforcements using the most modern technologies for batch mixing concrete.

Currently Toronto Redi-Mix has three plants which are located in Concord, Brampton and Etobicoke. Our head office and central dispatch system is located in Concord. With the most innovative modern technologies Toronto Redi-Mix continues to serve the industry as one of the largest independent ready-mix producers in Ontario. Recently adding the FIRST Computer Colour Batching System in Ontario, the company is ready to continue meeting the modern and demanding needs of the industry with the highest level of quality and customer service they are known for.
